PROJECTS

Spendly – Mobile Finance Tracker App

Spendly helps users manage personal finances by tracking income, expenses, and budgets. It offers spending analysis, budget alerts, and data backup for seamless financial control. (Android Studio, Kotlin)

BuildMart – Construction Bidding & Procurement System

BuildMart is a web platform that streamlines service bidding, material procurement, inventory management, and financial tracking for construction projects. (MERN, Tailwind)

Boutique – Hotel Management System

Boutique is a Java-based platform for managing hotel bookings, room inventory, and guest records, built to streamline operations and enhance service efficiency. (Java, HTML, CSS, JavaScript, Bootstrap, SQL)

Urban Nestle – Apartment Booking System

Urban Nestle is a PHP-based system enabling users to explore, book, and manage apartments easily. It streamlines the rental process for tenants and property owners. (PHP, HTML, CSS, JavaScript, MySQL)
